Project Overview

The Singer Solar project creates jobs, economic growth and clean energy.

Map is representative of project location but is not to scale and the icon does not indicate actual project boundaries.

SINGER SOLAR PROJECT

200 Megawatts of Clean Energy in Beauregard Parish, Louisiana

For decades, NextEra Energy Resources' subsidiaries have been helping fuel America's economic growth and quality of life and moving our nation toward energy independence. To date, we operate solar projects in more than 30 states, and the Singer Solar project will be among the first solar projects in Louisiana.

Features of the Singer Solar project:

- Photovoltaic (PV) solar arrays capable of generating up to 200 megawatts (MW) of clean, renewable energy.
- The project encompasses approximately 1,970 acres.

- Subject to local and state approvals, the project is scheduled to begin operations as early as January 2026.

COMMUNITY BENEFITS

Bringing Economic Opportunities

Solar projects generate home-grown, renewable energy, while preserving clean air and water. They can also generate significant economic benefits for the communities that host them.

Employment Opportunities

The Singer Solar project will create local employment opportunities, including up to 250 jobs to construct the project.

Parish Tax Revenue

The project provides approximately $38 million* in additional revenue for the Beauregard Parish, money that can enhance local roads, schools and services.

Want to Participate?
