Renewable Energy Permitting

C&E administers several distinct permits applicable to renewable energy facilities. A facility may need more than one permit from C&E, as each permit covers a different facility component and is triggered by different threshold requirements. Submit completed applications to DCE-Renewables@la.gov

Types of Permits Administered & Application Forms

The sections below outline the types of permits administered by C&E, each permit's requirements, and application forms.

Solar Decommissioning Permit

Solar Siting Permit

Immediate Solar Permit

Act 279's Opt-Out for Local Authorities

Local governing authorities may opt-out of the statewide siting requirements established by Act 279 of the 2025 Legislative Session. To opt out, the local authority must have adopted solar ordinances and submit a resolution to C&E. Instructions for completing the option to opt out are provided below.

If Your Parish Has A Solar Ordinance

If your parish has enacted a solar ordinance, you are eligible to opt out of statewide siting requirements pursuant to La. R.S. § 30:1142(B).

To formally opt out of utilizing the statewide requirements for solar power generation facility siting pursuant to La. R.S. § 30:1144:

- Your parish must have adopted a solar ordinance.
- Your parish must draft and adopt a simple resolution.
    1. The resolution must contain reference to the local ordinance.
    2. The resolution must be signed under local jurisdictional regulations.
- Once adopted, send a copy of the opt out resolution and parish solar ordinance to DCE-Renewables@la.gov

If Your Parish Does Not Have A Solar Ordinance

If your parish has yet to enact a solar ordinance, solar power generation facilities under development in your area are now mandated to follow the statewide siting requirements pursuant to La. R.S. § 30:1144.

If your parish wishes to enact a local ordinance, please either contact your area Regional Planning Commission or seek other

sources of technical assistance.

Once your parish has enacted an ordinance, you may follow the procedure above to opt out of statewide siting requirements.

Issued Permits
