CEO/General Manager
Mille Lacs Energy Cooperative
Aug 2016 - Nov 2018 · 2 yrs 4 mos
Aitkin, MN

Lead day-to-day operations of 46 employee cooperative offering electric distribution, log distance and internet services to approximately 15,000 members. Manage MLEC in accordance with the objectives and policies established by the board of directors and develop and implement strategies and tactics for achieving the board's objectives to ensure the long-range success of MLEC.

Ensure that MLEC meets its goals by planning, directing, and controlling the day to day operations and that long-range plans and strategies are developed to meet future goals and action plans are developed to implement the strategies. Ensure plans, strategies, policies, and operations comply with applicable federal, state and local laws, rules, and regulations, and that MLEC fulfills its contractual obligations. Effectively manage and safeguarding of MLEC's financial resources. This includes the appropriate acquisition of required capital and the development and recommendation of rates adequate to ensure the fiscal solvency of MLEC. Develop and manage MLEC's human resources through effective and competitive personnel practices and programs. Ensure the development and maintenance of favorable relations and image with MLEC's members, legislators, regulators, other organizations, and the general public.

Energy Management, Risk Assessment and +12 skills

Manager, Regulatory Affairs
Xcel Energy
2012 – Nov 2018
Minneapolis, MN

Transitioned from Corporate Regulatory to Nuclear Policy Development position created as part of a succession plan. Inherited two areas due to internal restructuring efforts: Currently supervise North American Electric Reliability Corporation (NERC) Compliance Team and licensing activities related to Fukushima compliance requirements for Nuclear Business Unit (NBU). Developing process, procedures and performance metrics to support a NBU stand-alone NERC compliance program. Oversee licensing activities and regulatory submittals related to compliance with the Nuclear Regulatory Commission's Fukushima Orders affecting Monticello and Prairie Island Nuclear Generating plants

Energy Management, Permit Applications and +9 skills

Manager of Regulatory Administration,
Northern States Power Company Minnesota
2006 – 2012
Minneapolis, MN

Selected to move into role at corporate headquarters to focus on multi-year state relicensing effort of the Monticello and Prairie Island Nuclear Generating Plants. Served as regulatory liaison with state regulatory agencies – primarily on nuclear issues. Provided strategic direction and authorship in Resource Plans and led cross functional, multidisciplinary project teams in development and support of multiple Certificate of Need applications including filings supporting life extension of nuclear plants, additional nuclear waste storage, new renewable energy projects (wind farms), and purchased power agreements.

Energy Management, Permit Applications and +11 skills

Northern States Power Company Wisconsin
12 yrs 1 mo

Manager of Regulatory Policy
1999 – 2006
Madison, WI

Selected as part of 5 person internal team to open Madison Office for NSP to increase business community, regulatory and legislative relationships. Industry was shifting towards deregulation, transmission companies and State-run energy conservation programs (public benefits). Promoted into broader leadership role to serve as primary liaison with state regulators and Wisconsin and Michigan electric and natural gas utility companies.

Skills: Energy Management, Permit Applications, +10 skills

Senior Planning Analyst
1994 – 1999
Eau Claire, WI

Progressed through roles of increasing scope and responsibility to serve as primary regulatory liaison on demand-side planning, load management, program evaluation and market research activities for NSPW's marketing department. Interacted with regulators and state-wide DSM task force consisting of utility representatives and intervenors. Developed and supported regulatory approval of new program tariff sheets and coordinated all DSM and marketing-related compliance filings. Developed and presented senior management with policy positions regarding industry restructuring.

Skills: Energy Management, Permit Applications, +2 skills

Senior Associate
Electric Power Software, Inc
1989 – 1994
Plymouth, MN

Hired away from NSPM Intern role preparing DSM portion of first Resource Plan to work as an energy consultant on the development of and consulting with demand-side management (DSManager) and integrated resource planning (IRPManager) software. Conducted benefit/cost screening and demand-side management program design for electric and natural gas utility companies. Wrote proposals, outlined budgets and timelines, supervised projects, and prepared client presentations.
