Bcc Gregory W. Belfour <gwb@jonestete.com>; [redacted] Board Members [redacted]

Board Members,

Two things:

Some of you may be a little confused about item 9E on the agenda for Tuesday so I thought I would give a little information.

This is a donation agreement with a solar company (Orion) for a project in the Dequincy/Moss Bluff area (Persimmon Gulch). They want to give between $150,000 and $200,000 annually (depending on the size of the project) split among the four schools in DeQuincy and the four in Moss Bluff. This will only take effect if the project is built.

They want a contract in order to do this so that the agreement is binding if they get bought out . In terms of Partners in Ed, we don't do a lot of contracts (with the exception of Citgo. They do contracts for their STEM Academies that have been in place for quite a while). However, after letting Greg look over this, with this type of donation contract, it probably needs to get board approval.

I know that this project has been in the news quite a bit so I wanted to make you aware.

I think that our schools could utilize the money.

Additionally, we received approval this week from Judge Cain to move forward with the District 33 Bond Issue in the Spring. Consequently, it will not say "pending judicial approval" before the resolution because we already received that approval. I will mention this before you vote on Tuesday onthe resolution so it is on the record as well.

As usual, if you have any questions, feel free to call.

jv
