Freedom of Information Act Request

I am requesting records under the Freedom of Information Act concerning Space Exploration Technologies Corp. (SpaceX), the proposed "Starbase Louisiana" commercial launch facility in the Pecan Island / South Vermilion Parish area of Louisiana, and any related FAA Office of Commercial Space Transportation (AST) environmental or National Historic Preservation Act Section 106 review.

Date range: January 1, 2025 through the date this request is processed.

Please provide, in electronic form where available:

1. Section 106 initiation, scoping, or consultation letters concerning Starbase Louisiana, Pecan Island, South Vermilion Parish, or SpaceX's proposed Louisiana launch site.
2. Any proposed or final Area of Potential Effects (APE) maps, descriptions, GIS files, or related determinations.
3. Phase I cultural resources surveys, archaeological surveys, cultural resources assessments, literature reviews, historic-property identification reports, or determinations prepared for or received by FAA concerning the proposed site.
4. Correspondence between FAA/AST and SpaceX, Louisiana SHPO/Office of Cultural Development, U.S. Army Corps of Engineers, Advisory Council on Historic Preservation, or consulting Native American tribes regarding archaeology, historic properties, cultural resources, unmarked burials, or Section 106.
5. Records identifying whether previously recorded archaeological sites or mound groups in the Pecan Island area were considered in scoping the undertaking or APE. I am not requesting public disclosure of restricted archaeological-site coordinates if those locations are protected from disclosure; redacted records or a determination identifying whether known resources intersect the APE would be sufficient.
6. Any cultural-resource or Section 106 records inherited, reviewed, or referenced from prior federal permitting or due-diligence work on the former Exxon/ExxonMobil Pecan Island property now associated with the SpaceX development.

Please search records held by the FAA Office of Commercial Space Transportation and any FAA office participating in environmental review of the proposed Louisiana launch site.

I am a representative of the news media. This request is made for newsgathering on behalf of 337.NEWS, an independent Southwest Louisiana publication, and not for commercial use. I request classification in the news-media fee category and a waiver of fees where applicable because disclosure will contribute to public understanding of federal permitting and historic-preservation review for a project of substantial public interest. If fees are expected to exceed $25, please contact me before incurring them.

Please provide responsive records electronically by return email whenever possible. If any portion is withheld, please release reasonably segregable non-exempt material and identify the applicable FOIA exemption.

Thank you,

Dalton Barron
