Subject:	[Non-DoD Source] FOIA Request — Pecan Island / Starbase Louisiana Cultural Resources and Section 106 Records
Date:	Monday, September 21, 2026 3:24:08 PM

Freedom of Information Act Request

I am requesting records under the Freedom of Information Act concerning cultural-resource and National Historic Preservation Act Section 106 review in the Pecan Island / South Vermilion Parish area associated with (1) ExxonMobil Low Carbon Solutions Onshore Storage, LLC's former Pecan Island project and (2) any subsequent or current SpaceX / Space Exploration Technologies Corp. development or permit activity on the same or overlapping property.

Date range: January 1, 2023 through the date this request is processed.

Please provide, in electronic form where available:

1. The complete cultural-resources / Section 106 administrative record associated with USACE file MVN-2023-00058-WII, including consultation correspondence, cultural-resource assessments or surveys, SHPO correspondence, tribal consultation, archaeological determinations, maps, and any findings of effect.
2. Any Phase I cultural resources surveys, archaeological surveys, desktop reviews, site-file reviews, shovel-test or remote-sensing reports, or other cultural-resource work prepared for or submitted in connection with MVN-2023-00058-WII or related ExxonMobil Pecan Island permitting.
3. Any records concerning known archaeological sites, Native American mound sites, human burials, or historic properties considered during review of the Pecan Island project area. I am not requesting public disclosure of restricted archaeological-site coordinates if protected by law; please provide redacted records or non-sensitive determinations where necessary.
4. Any pre-application correspondence, jurisdictional determinations, permit applications, Section 106 scoping, or cultural-resource review involving SpaceX / Space Exploration Technologies Corp. / "Starbase Louisiana" in Vermilion Parish, including any successor, modification, transfer, or new application involving the former Exxon/ExxonMobil Pecan Island property.
5. Correspondence with the Louisiana State Historic Preservation Office / Division of Archaeology, FAA, Advisory Council on Historic Preservation, SpaceX, ExxonMobil, project consultants, or consulting Native American tribes concerning cultural resources within the Pecan Island project area.
6. Any Area of Potential Effects maps, GIS files, site plans, or project-footprint materials used for Section 106 review of either the former Exxon project or any SpaceX-related undertaking in the same area.

I am a representative of the news media. This request is made for newsgathering on behalf of 337.NEWS, an independent Southwest Louisiana publication, and not for commercial use. I request

classification in the news-media fee category and a waiver of fees where applicable because disclosure will contribute to public understanding of federal permitting and historic-preservation review for a project of substantial public interest. If fees are expected to exceed $25, please contact me before incurring them.

Please provide responsive records electronically by return email whenever possible. If any portion is withheld, please release reasonably segregable non-exempt material and identify the applicable FOIA exemption.

Thank you,

Dalton Barron
