BEFORE THE

LOUISIANA PUBLIC SERVICE COMMISSION

APPLICATION OF ENTERGY LOUISIANA, LLC FOR CERTIFICATION OF THE BABEL – WEBRE 500kV TRANSMISSION PROJECT IN ACCORDANCE WITH LOUISIANA PUBLIC SERVICE COMMISSION GENERAL ORDER DATED SEPTEMBER 10, 2024	)	**DOCKET NO. U-37812**

UNCONTESTED STIPULATED SETTLEMENT AGREEMENT

Pursuant to Rule 6(B) of the Rules of Practices and Procedures of the Louisiana Public Service Commission (the "LPSC" or the "Commission"), this Uncontested Stipulation Settlement Agreement is entered into on this 27th day of August, 2026 by and between the Staff of the Louisiana Public Service Commission (the "LPSC Staff" or the "Staff") and Applicant Entergy Louisiana, LLC ("ELL" or the "Company"), through undersigned counsel, and, if approved by the Commission, would resolve all issues related to the Application in this docket. Staff, ELL, and the Southern Renewable Energy Association ("SREA") support this Uncontested Settlement, and the Louisiana Energy Users Group ("LEUG"), Alliance for Affordable Energy (the "Alliance"), and Union of Concerned Scientists ("UCS") do not oppose. Staff and ELL believe that the Uncontested Settlement agreed to herein is reasonable in light of the record, consistent with the law and orders of the Commission, and is in the public interest. SREA, LEUG, the Alliance, and UCS join in this Uncontested Settlement through undersigned counsel to confirm no opposition.

Therefore, Staff and ELL agree to resolve the above-captioned matter and seek Commission approval of this Uncontested Settlement, including all terms below.

TERMS

1. Under the Commission's General Order dated September 24, 2024 in Docket No. R-36199 (the "2024 Siting Order"),[1] the construction, completion, and siting of the components of the Louisiana portion of the Babel – Webre 500kV Project[2] will serve the public convenience and necessity and be in the public interest and are therefore approved, including principally the following Project components:

   a. the construction of a new approximately 147-mile 500kV transmission line in south Louisiana extending from the reconstructed Webre substation to the Texas border (Sabine River); and

   b. the reconstruction of the Webre 500kV Switching Station;[3]

   And, further, undertaking the construction of the Project components would therefore be prudent, serves the public convenience and necessity, and meets the conditions of certification in accordance with the 2024 Siting Order and other applicable Commission orders.

2. The generalized siting of the Babel – Webre 500kV Project is appropriate, and its construction is a reasonable and cost-effective solution to provide reliable electric service to the anticipated load growth in southeast Louisiana and the Amite South region, and to maintain compliance with applicable federal regulations as the Company serves a new large load customer in northeast Louisiana, as described in the Company's Application.

3. The actual retail revenue requirement associated with the prudently incurred costs of the Babel – Webre 500kV Project, an estimate of which is provided by Company witness Ryan Jones in his Direct Testimony in support of the Application, is deemed eligible for recovery by the Company at the time that the components of the Babel – Webre 500kV Project are placed in service through the Company's Formula Rate Plan ("FRP") to the extent the Company remains subject to one, or in the alternative where

---

[1] *See* General Order (Sept. 10, 2024), *In re: Review and Possible Modification of the Commission's General Order dated October 10, 2013 Governing Transmission Certification and General Siting* ("2024 Siting Order"), Docket No. R-36199.

[2] As noted in the Application, the certification requested is only for the portion of the transmission line and related components located in Louisiana, which will be owned by ELL. Entergy Texas, Inc. ("ETI") will own the portions of the Project located in Texas, including construction of an approximately 4-mile 500kV transmission line in Texas and the construction of the Babel Switching Station in Texas, and ETI will be responsible for paying for the portions of the Project in Texas.

[3] ELL's Application and Direct Testimony include descriptions of the reconstruction of the Webre 500kV Switching Station as part of the Babel – Webre 500kV Project, even though the 2024 Siting Order expressly excludes switching stations from the definition of "Transmission Facility" to which the Commission's certification requirement applies. *See* 2024 Siting Order at Section II(a) (definition of "Transmission Facility").

there is no FRP, the Commission authorizes the creation of a regulatory asset which shall accrue carrying charges on the net of tax balance at the then-effective weighted average cost of capital until such time that the costs can be reflected in rates.

4. The Commission approval should in no manner serve as a determination of the prudence of the final costs of the Babel – Webre 500kV Project. The Company has an ongoing obligation to prudently manage the Babel – Webre 500kV Project, including but not limited to ongoing construction and costs and whether to continue the investment. The certification of the Babel – Webre 500kV Project is not a determination of prudence of the final costs of the Project but rather only a determination that the prudently incurred costs of the project are eligible for recovery from customers. The estimates provided in the Application are only current Class 3 estimates, and the final costs will be submitted in the normal ratemaking process.

5. ELL will file with the Commission semi-annual reports pursuant to and consistent with the terms of Section VI (Construction Reporting) of the Commission's 2024 Siting Order, and such construction reporting requirements shall apply to all components of the Project (*i.e.*,the Switching Station Components, Right of Way Components, and Proposed Transmission Facilities) including those components that may or may not individually qualify for exemption from certification, or fall outside of the Commission's consideration under the 2024 Siting Order.

6. The Uncontested Settlement as a whole is reasonable, should be approved by the Commission, and is in the public interest.

7. This Uncontested Settlement will be effective and enforceable upon approval by the Commission. The LPSC Staff, the Company, SREA, LEUG, the Alliance, and UCS agree to promptly file this Uncontested Settlement and to cooperate and take reasonable steps to request the approval of this Uncontested Settlement by the Commission.

8. Except as expressly stated herein, this Uncontested Settlement shall have no precedential effect in any other proceedings involving issues similar to those resolved herein and shall be without prejudice to the right of any party to take any position on any such similar issues in future proceedings, including FRP proceedings, base rate proceedings, rulemakings, or in other regulatory proceedings or appeals therefrom. Other than in a proceeding to approve, implement, administer, or enforce a requirement of this Uncontested Settlement, the Uncontested Settlement shall not be admissible in evidence against either the Staff, ELL, SREA, LEUG, the Alliance, or UCS, and the terms of this Uncontested Settlement may not be used as an admission of any sort in any proceeding whatsoever except to approve or enforce the terms of this Uncontested Settlement. Nothing stated herein is intended to prohibit parties from continuing to cite to final Orders of the Commission, which Orders are the best evidence of their meaning and evidentiary or precedential value (if any).

WHEREFORE, this Uncontested Settlement is hereby executed by the undersigned counsel of the LPSC Staff, ELL, SREA, LEUG, the Alliance, and UCS on the 27th day of August, 2026.
